

『UNISDR RISK AWARD 2017』

## For Future Society and Sustainable Human security Contribution to SDGs and SFDRR Indicators

### What we do?

EpiNurse Project equip nurses with monitoring and surveillance tools to prevent and control infectious diseases after disasters.

### What we aim?

Collaborating with local nurses, named as EpiNurses, who conduct a participatory monitoring by using ICT toolkit, we aim to develop a disaster risk reduction method to ensure health security in shelters and communities.
